

Orono Veazie Water District Board of Trustees

Trustees Present – Bolton, Blease, Dastoor, Perkins, Bornman

- 1) Consideration of the agenda
- 2) Presentation from Wright-Pierce
Please see Wright-Pierce presentation and audio recording for details
- 3)
 - Trustee Blease – W/P emphasizes development of new well fields
 - Trustee Dastor - Other idea would be re-development wells and invest in plant to deal with TOC.
 - Trustee Bornman – New wells in existing location – W/P – may have same issues that are occurring in the existing wells
 - Trustee Perkins – Silvers auto, golf course and other hazards. Does Old Town draw off of same aquifer? W/P – yes and if we started to draw on them, it would not affect old town.
 - Trustee Bolton – Question regarding adding additional wells in same location as other wells and decreasing TOC. What are our options? W-P - coagulant – activated carbon system would most likely work but could cost up to \$4 million.
Trustee Perkins – W-P – should work on strategic valve controls in the model to help move stagnate water.

All trustees will send comments to Joan by January 19, 2016.
- 4) Compliments from Public
 - a. David King – Prior to 1995 no stand pipe.
Trustee Blease – Question regarding moving water in the Buck Hill stand pipe. – forcing more water through the stand pipe.
Trustee Bornman – statement about the hydraulic model and Capitol Improvement Plan
Trustee Dastoor – Trustees should make a priority list.
- 5) Regular January Meeting – Trustee Borneman suggests we skip January 5, 2016
- 6) February 2 2016 at 7pm.
Trustee Bolton - Motion to adjourn
Trustee Borneman Seconds
All in favor
